

## **LINE SPACING OPTIONS**

---

=====

Line spacing controls the vertical distance between lines of text.

Different spacing options allow for compact or expanded layouts.

---

### **1/6 INCH SPACING (Default - 6 LPI)**

Line 1: This is the default line spacing.  
Line 2: Standard for most documents.  
Line 3: Good readability and density.  
Line 4: 6 lines per inch vertical.  
Line 5: Used for general printing.

---

### **1/8 INCH SPACING (Compact - 8 LPI)**

Line 1: More compact line spacing.  
Line 2: Fits more content per page.  
Line 3: Good for listings and tables.  
Line 4: 8 lines per inch vertical.  
Line 5: Saves paper on long documents.  
Line 6: Still readable at this density.  
Line 7: Extra line to show density.  
Line 8: One inch of text here.
