

## AUTOMATIC WORD WRAPPING

---

`printWrapped()` automatically breaks text at word boundaries.  
Text wraps when it reaches the right margin of the page.

---

### BASIC WORD WRAPPING

Short text:

This is a short line that may or may not wrap.

Medium text:

This is a medium-length paragraph that demonstrates how text is wrapped at word boundaries when it exceeds the printable width of the page.

Long text (Lorem Ipsum):

  Lorem ipsum dolor sit amet, consectetur adipiscing elit. Sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum.

---

### WORD WRAP AT DIFFERENT CPI

10 CPI (standard):

The quick brown fox jumps over the lazy dog. This sentence is used to demonstrate how different character densities affect word wrapping
