

~~MyBatis Documentation~~ Demo --- ABSOLUTE POSITIONING DEMO

Normal Flow vs Absolute Positioning

Elements in normal flow are positioned sequentially.

Absolute positioning places elements at specific coordinates.

NORMAL FLOW:

Item 1 - flows normally

Item 2 - follows Item 1

Item 3 - follows Item 2

ABSOLUTE POSITIONING:

(See *items below* - positioned at exact X,Y coordinates)

PRACTICAL USE: Watermark-style positioning

A watermark can be placed at an absolute position.

Normal content continues here...

The watermark above does not affect the flow.
